Experience

Senior Manager, Threat Research and Analytics

CenturyLink April 2018-April 2019

- Developed new tools for security **log analysis** using emerging data science techniques.
- Integrated **threat intelligence** feeds into Managed Security Services Platform.
- Implemented large-scale security log **data collection** technology for multi-tenant data centers.
- Implemented technologies and methods for **cloud monitoring** in Azure and AWS.
- Built **development labs** in AWS, Azure and CenturyLink Cloud

Manager, Architecture and Analysis

CenturyLink April 2016-April 2018

- Developed and presented security **solution architectures** for corporate and government customers.
- Formed a **new team of cyber security architects** in support of customer capture around Managed Security **Service offerings:**
  - *security policy and governance*
  - *FISMA compliance*
  - *vulnerability assessments/pentesting*
  - *firewall/IDS management*
  - *DDoS mitigation*
  - *incident response*
  - *cloud monitoring*
  - *security log monitoring and SIEM support*
- Managed technology integration **partnerships** with security vendors:
  - IBM
  - Cisco
  - Palo Alto
  - Imperva
  - LookingGlass
  - ThreatConnect
  - RiskSense and others
- Made technical contributions to RFPs, RFIs, and SOWs, and **presented solutions** to customers.
- **Managed solution architects'** contributions to customer deals.
- Helped Increase new **security practice revenue** to over $50 million/year.
- **Deployed to AWS** to reduce operating costs and increase efficiency of the Security Monitoring Platform.
- Worked with analysts and developers on **new use-cases.**
- Helped develop **SOC analyst playbooks**, tools, and automation.
- Worked with team on developing **parsing and correlation technology** for security log files.

Service Delivery Manager

NetAura LLC August 2015-April 2016

- Developed and delivered an innovative Managed **Security Services Platform** leveraging proprietary collection technology and cloud-based analysis and reporting in a FedRamp certified environment.
- The platform was **recognized as innovative** by industry analysts such as IDC, Forrester, and Gartner, and increased CenturyLink's rating as a Managed Security Services Provider.
- Held platform demonstration sessions at the **APAC region RSA conference** in Singapore to accompany APAC product launch.

Senior System Security Engineer

NetAura LLC November 2014-August 2015

- **Engineering Lead of a DHS SOC** for the Transportation Security Administration (TSA).
- Oversaw the technical operation and on-going development of an **ArcSight**-based SIEM.
- Participated in **incident response** activities
- Held regular **POA&M reviews**
- Delivered regular status and metrics **reports to the federal agency CISO.**
- Held **Top Secret clearance**.

Systems Manager

National School Boards Association October 1990-April 2014

- Built and operated various enterprise IT systems including: VAX VMS, Microsoft enterprise networking and applications, inter-**networking systems, firewalls, switches, and routers.**
- Created and managed highly effective **intrusion detection systems.**
- **Passed all security** audits by independent network security auditing firms.
- **Implemented PCI** compliant E-commerce security controls for credit card transaction-oriented websites.
- Implemented subnetted enterprise **addressing architectures**.
- Created and managed **backup and recovery systems** providing 0% data loss for several years covering a network of 200-300 nodes.
- Provided **technical support** at all levels of the organization.
- Managed numerous installations, upgrades and rollouts of **enterprise-scale applications and services** such as: Active Directory, Microsoft Exchange, IIS, ActiveSync, SQLServer.
- Managed migrations through several Tier 1 **Internet access technologies** and provider relationships.
- Created and led a national technical **work-alike group** for IT professionals.

Other Areas of Experience

- Intrusion detection and mitigation
- Firewall, router and switch configuration and management
- Packet analysis
- DNS and IP addressing
- Network resource auditing and reporting
- Network analysis, troubleshooting and tuning
- VPN and remote access
- Technical project management and communication
- Network/Internet topology and routing
- Server and workstation performance analysis, troubleshooting and tuning
- Enterprise application hosting and performance
- Physical data center management

Platforms and Tools

- Linux, Windows, VMS, Solaris, Mac
- Cisco, Procurve, SonicWall
- Python, Perl, JavaScript, PowerShell, Bash
- ArcSight, QRadar, McAfee NSM
- ElasticSearch, Kibana, Syslog-NG
- Kali, Qualys, Nessus, NMAP, Shodan
- GitHub, GitLab
- SysInternals
- Neo4
- AWS, Azure, Google Cloud, CenturyLink Cloud
- MITRE ATT&CK
- Microsoft Word PowerPoint, Excel
- Salesforce

Certifications/Coursework

- SANS GSEC
- Microsoft Certified Server Performance Management
- Microsoft Exchange Management
- Digital Certified VMS and Pathworks Management
- Computer Engineering coursework - George Mason University
- Liberal Arts coursework - Northern Virginia Community College
- English Literature coursework - Georgetown University

Memberships/Publications

- SANS Institute
- Cybersecurity Innovation Forum at George Mason University
- OWASP Northern Virginia Chapter Group
- Enterprise Knowledge Graphs Group
